HOW TO SET THE ANALOG

If there is a plastic piece under the crown, gently remove it, press the crown down to normal position. Refer to the diagram below, gently pull the crown out to the first click position, The second hand will stop when the crown is in the first click position. When in the first click position, turning the crown will change the minute and hour hands. Set the correct time, then gently push the crown back to normal position, and the second hand will begin moving again indicating normal operation.
